

Project Deliverables Submission Structure

Students need to create the folders as per the project phase and upload the files in the respective project folder as per the phase.

Step 1 - Create the Assignment Folder and the respective sub folders in it as shown below

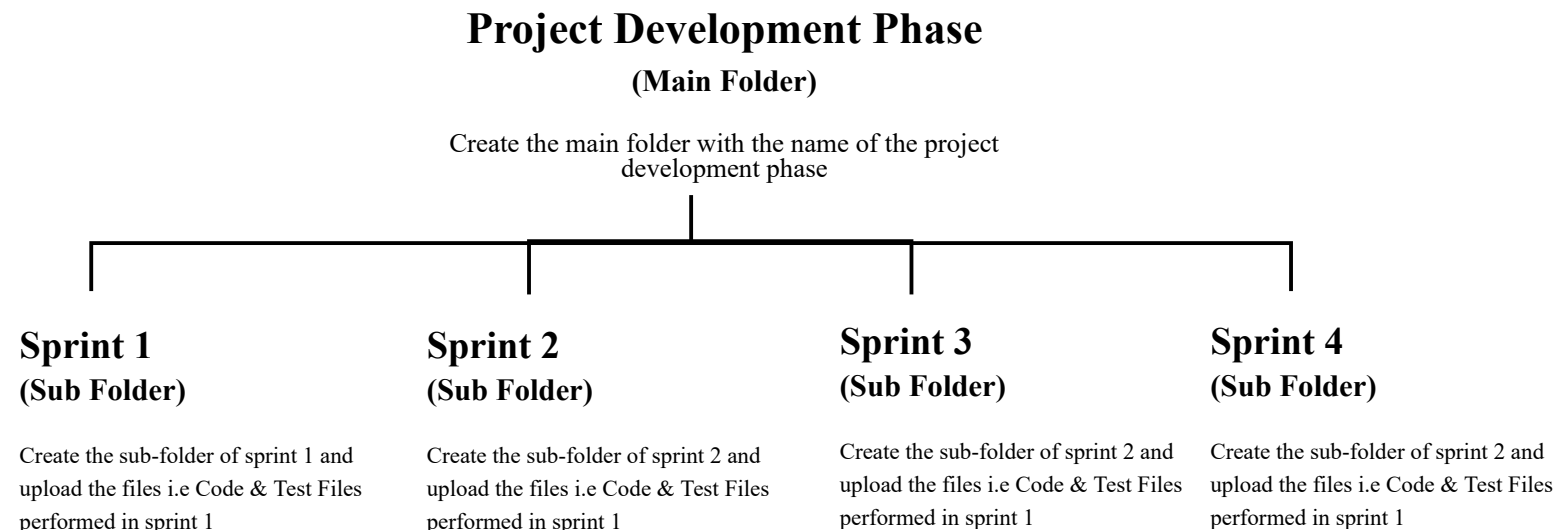

Step 2 - Team Leads needs to create the **Project Design & Planning** folder to submit the files in the respective folders

Note: In this phase only the team leader has to submit the files of the phase its the team based submission not the individual submission

Step 3 - Team Leads needs to create the **Project Development Phase** folder to submit the files in the respective folders

Note: In this phase only the team leader has to submit the project related files its the team based submission not the individual submission

Step 4 - Team Leads needs to create the **Final Deliverables** folder to submit the files the final code files along with the project report and the dataset used if any.

Final Deliverables

(Main Folder)

Create the main folder with the name of final deliverables and submit the final code, project report, dataset (if any).
